Jessey Novani

On the 'Grafisch Lyceum Utrecht' Jessey has developed himself as an excellent student. His exemplary performance made it possible for him to participate in the international program in Sweden.

Due to his experience we've decided to ask him to become a teacher-assistant and support our first-year students during their project.

Jessey excels through his pro-active attitude, communicative skills and programming specific knowledge. He is very well able to share his skills with others.

Because of the support given during the project the first-year students showed great motivation and delivered high quality products.

We as teachers of the 'Grafisch Lyceum Utrecht' are grateful to Jessey for his contribution to this project.

*Kind regards,*
