Personal profile

From an early age, I have been involved with technology. I became more and more involved with computers. I do this too, like now. Likewise, I have found that I can make something out of nothing; the computer does what I want. Next to my school, I also started helping others with their computers. This is how I help people with their servers, making one program or website or troubleshooting. I'm helpful. I like to others help and please them. Qualities that I can use in my work are my eagerness to learn, the desire to solve problems and Humour. I learn by practising with that I expand my knowledge. If I don't know, I'll find out. Like me, If something is asked, I will do it immediately. As a result, I work quickly, but I also do this to keep an overview to hold. I would like clear and concrete tasks and someone I can turn to so that I can find solutions come.

Work experience

Sep. 2024 - modernity Retail at Bo-Rent Breda

Oct. 2023 - modernity Co-Founder at [Starbrew Games](#)

Sep. 2016 – Feb. 2018 Mail man at Sandd

Internships

Game company Sneakymammoth

Game company Capitola

2016 – 2020 MBO Game Developer Level 4 Diploma achieved

2012 – 2016 VMBO-TL Diploma achieved

Language skills

Dutch and English

Computer knowledge

I have broad knowledge in computers. I had a typing course. In addition, I can work with different word processors. I also know how to work with VMs (virtual computers) and I can control servers remotely. I can set up networks at home. Not only that, but I am good at computer hardware, software and programming. I have knowledge of several programming languages such as C++, C#, Java, JavaScript, PHP, HTML, CSS and MySQL.

Interests

Virtual Reality, Playing retro games, Programming, Game design

Particularities

At home, I am busy programming for others and in collaboration with others on a daily basis. Handy help, open, I quickly understand how something new works.
